Wyatt-Quarles "Tested and Adapted" Seeds

Just a claim? No. The term "tested and adapted" has a real meaning for everyone planting seeds in the Southeast. First: of the hundreds of thousands of varieties available, only those best suited to this area are offered. Secondly: every lot is produced by qualified and experienced professional seed growers in the particular area best suited for that variety. Thirdly: Parent seed stocks are carefully checked in trial ground plantings before the crop is produced and every Wyatt-Quarles seed crop is rigorously supervised during production for purity of strain and variety. Fourth: After careful curing and processing under individual lot numbers for control, every lot is sampled and tested, not once but many times during storage. Complete records are kept on every lot beginning with the trial planting before production and throughout the production, processing and storage periods. This is, then, the meaning of "tested and adapted." More important, to us, is our name and reputation which goes with every package, and transcends all of the "know-how" gained in our 88 years of service. Neither the care, the quality, nor the seeds in the bag can ever be better than the NAME on the bag. Ask your neighbor about Wyatt-Quarles seeds—or better still—plant them. We are sure you will be pleased!

TOMATOES

TURNIPS

CULTURE: The tomato is a warm season crop and requires a relatively long season. The general practice for a spring crop is to sow the seed in a warm protected bed in late January or early February. The seedlings may be transplanted to a cold frame prior to transplanting to the field, or they may be thinned and transplanted direct from the original bed. In either case, the plants should be hardened sufficiently to stand the field conditions. They should not be set to the field before the danger of freezes is past. Space plants 2 to 3 feet apart in rows 4 to 5 feet apart. One-fourth pound of seed will produce enough plants for one acre.

732 Manapal Manapal was grown and tested at N. C. Experiment Station at Method, in soil heavily infected with Fusarium Wilt. All varieties in the test died except Manapal, Marion and Homestead. Wyatt-Quarles Lawn Grass Seeds

A smooth, green lawn is your home's greatest beauty asset. Deep, thorough preparation, proper fertilization and good seed are the most important steps toward a successful lawn. Read "10 Steps in Lawn Building," then select the mixture below, most suited to your needs. The results will please you.

Wyatt-Quarles CAROLINA LAWN GRASS MIXTURE

F-60. W.-Q. CAROLINA MIXTURE of lawn grass seeds is an improvement on all the better mixtures offered heretofore at comparable prices. Our constant experiments have taught us just what grasses are best suited for eastern and southern states. The finest seeds of these varieties are carefully re-cleaned and blended into our Carolina Mixture so as to give the very best results obtainable. Sow 6 lbs. per 1,000 sq. ft. Prices: 5 lb. bags \$5.35, postpaid. Not prepaid 10 to 49 lbs. @ 82c lb.; 50 lb. bags @ 77c lb.

Wyatt-Quarles SUNNY SOUTH LAWN GRASS MIXTURE

F-59. W.-Q. SUNNY SOUTH MIXTURE. For lighter soils and soils that become extremely dry, and in locations subjected to extreme heat during the summer months Wyatt-Quarles Sunny South Mixture of lawn grasses is recommended. The grass varieties including Bermuda used on golf greens over the entire South predominate in this mixture. Only the purest stocks are used. Sow 6 lbs. per 1,000 sq. ft. Prices: 5 lb. bags \$5.35, postpaid. Not prepaid 10 to 49 lbs. @ 82c lb.; 50 lb. bags @ 77c lb.

Wyatt-Quarles COASTLAWN LAWN GRASS MIXTURE

F-63. W.-Q. COASTLAWN. A mixture of grasses particularly adapted to our eastern coastal plain soils. It should be considered for lighter soils where reasonable moisture levels are the rule. Prices: 5 lb. bags \$4.85, postpaid. Not prepaid 10 to 24 lbs. @ 72c lb.; 50 lb. bags @ 67c lb.

Wyatt-Quarles SHADY NOOK LAWN GRASS MIXTURE

F-61. W.-Q. SHADY NOOK LAWN GRASS. A carefully blended mixture of exclusively perennial grasses best adapted to shaded situations. Use 6 lbs. per 1,000 sq. ft. These shade tolerant varieties are seriously injured by close mowing during warm dry weather, particularly during their first 2 or 3 seasons. We recommend they be allowed to go un-cut during the summer, June through September, until well established. Where the soil is acid from poor drainage or drippings from trees, occasional applications of agricultural lime should be made at the rate of 5 lbs. per 100 sq. ft. Prices: 5 lb. bags \$6.25, postpaid. Not prepaid 10 to 49 lbs. @ \$1.00 lb.; 50 lb. bags @ 95c lb.

LAWN GRASSES

Prices fluctuate. Please write for quantity prices.

F-48. BERMUDA (Unhulled). The most valuable of grasses for the South. Nutritious pasture or hay, tolerates poor soil; permanent, withstands intense heat, drought and hard usage. Bermuda grass performs on more golf greens, athletic fields, residential and industrial lawns and permanent pastures than any other variety. These "natural" seeds (unhulled) may be seeded at any time of the year since they are protected by the extremely tough hull. Germination will not take place until warm weather in late spring. Use 3 pounds per 1,000 sq. ft. Clip close and often during the summer growing season. The dense sod browns during winter months. Prices: lb. \$1.30; 2 to 4 lbs. @ 95c lb.; 5 to 10 lbs. @ 80c lb., postpaid. Not prepaid 10 to 49 lbs. @ 55c lb.; 50 lb. bags @ 50c lb.

F-37. HULLED BERMUDA. You buy only the fine seed kernel itself in this pure, hulled Bermuda seed. Should be sown only after the soil is warm in the spring. Sow 2 lbs. per 1,000 sq. ft. Prices: lb. \$1.60; 2 to 4 lbs. @ \$1.25 lb.; 5 to 10 lbs. @ \$1.10 lb., postpaid. Not prepaid 10 to 49 lbs. @ 85c lb.; 50 lb. bags @ 80c lb.

F-51. CARPET. Beautiful, dark green, low creeping grass and excellent for the low moist soils of the coastal areas. Shade tolerant. Spring planting is preferable, March and April, or fall planting with Red Top. Sow 80 lbs. per acre (2 lbs. per 1,000 sq. ft.) Prices: 1 lb. \$1.60; 2 to 4 lbs. @ \$1.25 lb.; 5 to 10 lbs. @ \$1.10 lb., postpaid. Not prepaid 10 to 49 lbs. @ 85c lb.; 50 lb. bags @ 80c lb.

F-40. KENTUCKY BLUE. Very dark glossy green, remaining green most of the year where adapted. Makes little growth during midsummer, but starts growth in early spring. Ideal for lawns but requires deep, fertile, alkaline soil. Use lime and 8-8-8 fertilizer regularly. Never cut close during hot dry seasons. Seed 80 lbs. per acre (2 lbs. per 1,000 sq. ft.) Prices: lb. \$1.35; 2 to 4 lbs. @ \$1.00 lb.; 5 to 10 lbs. @ 85c lb., postpaid. Not prepaid 10 to 49 lbs. @ 60c lb.; 50 lb. bags @ 55c lb.

F-46. CHEWINGS FESCUE. Best for dense shade. Very fine leaved, dark green grass which once established withstands the poor dry soil under trees better than most others. Sow 4 lbs. per 1,000 sq. ft. Prices: lb. \$1.35; 2 to 4 lbs. @ \$1.00 lb.; 5 to 10 lbs. @ 85c lb., postpaid. Not prepaid 10 to 49 lbs. @ 60c lb.; 50 lb. bags @ 55c lb.

F-52. RED TOP. Adapted to many soil conditions, best suited to moist fertile soils, and drought tolerant. Sow 2 lbs. per 1,000 sq. ft. Prices: lb. \$1.35; 2 to 4 lbs. @ \$1.00 lb.; 5 to 10 lbs. @ 85c lb., postpaid. Not prepaid 10 to 49 lbs. @ 60c lb.; 50 lb. bags @ 55c lb.

F-43. RYE GRASS (Annual). The quickest germinating and fastest growing grass for lawn use. Sow early fall, 10 lbs. per 1,000 sq. ft. Prices: 5 to 10 lbs. @ 48c lb., postpaid. Not prepaid 10 to 99 lbs. @ 23c lb.; 100 lb. bags @ 18c lb.

F-80. WHITE DUTCH CLOVER. Stays green almost the year 'round, and if limed and fertilized improves the soil and serves as a nurse crop for grasses. Sow 1 lb. per 1,000 sq. ft. Prices: lb. \$1.65; 2 to 4 lbs. @ \$1.30 lb.; 5 to 10 lbs. @ \$1.15 lb., postpaid. Not prepaid 10 to 49 lbs. @ 90c lb.; 50 lb. bags @ 85c lb.

F-67 CENTIPEDE. Dense, low growing sod; crowds out weeds and other grasses; tolerates sun and shade and requires little mowing. Until recently propagated only by stolons requiring much labor and expense. Now Centi-Seeds are available for direct seeding. One pound plants 2000 to 4,000 sq. ft. Write for complete details. Prices: ¼ lb. \$3.95; ½ lb. \$7.75; 1 lb. \$14.95; 5 lbs. with seeder \$69.95, postpaid.

F-36. CREEPING RED FESCUE. A shade and drought tolerant variety that should be in every semi-shady or shaded lawn. The very fine leaves and dark green color improve the appearance of the lawn. Like other shade tolerant cool weather grasses this variety does not tolerate clipping below 2 to 3 inches until well established. 5 lbs. per 1,000 sq. ft. Prices: lb. \$1.30; 2 to 4 lbs. @ 95c lb.; 5 to 10 lbs. @ 80c lb., postpaid. Not prepaid 10 to 49 lbs. @ 55c lb.; 50 lb. bags @ 50c lb.
